

Digital gauge for general industrial applications Model DG-10

WIKA Data Sheet PE 81.66

Applications

- Mechanical engineering
- Hydraulics / Pneumatics
- Pumps / Compressors
- Service

Special Features

- Pressure ranges: from 0 ... 2 bar up to 0 ... 600 bar
- Display accuracy: 0,5 % ± 1 Digit
- Pressure connection: G1/4 DIN 3852-E, 1/4NPT and others
- Case: Stainless steel, Nominal size 80 mm
- Power supply: 2x 1,5 V Mignon cell AA

Digital gauge DG-10

Description

Robust, precise local display

The durable stainless steel housing and stand-alone battery power supply enable its flexible use across a range of applications and industries. For precise and fast pressure readings, a local digital display is the ideal solution. The bar graph indicator, integrated into the display, with its trailing pointer function, as well as a stored MIN/MAX peak value, enable the effective analysis of the measuring point.

Standard and Enhanced Models

For poor lighting conditions, an "enhanced" model (DG-10-E) with a back-lit display and a rotatable housing is available, allowing its optimisation to the local conditions. Additional configurable functions are: Auto Power-off, tare function, password protection. The standard design (DG-10-S) already allows the user to switch easily between the most widely-accepted international measurement units; bar, psi and MPa.

Proven measurement technology

Sensors manufactured by WIKA have, for decades, been a guarantee of high accuracy, long-term stability and repeatability within industrial pressure measurement. The most suitable sensor technology - metal thin-film or ceramic - is used, depending on each application and the measuring range.
